1. INTRODUCTION

The North Devon District Museums Service (NDDMS) has a significant collection of archaeological finds and records (archaeological archives) referred to as 'The Museum'. These archives represent a major part of our communal cultural heritage, and – for the periods of North Devon's rich history for which there are no documents or many buildings surviving – is the only evidence for what happened in the past, for illustrating how people lived and died, and for how the urban and rural landscape have developed over the centuries. By its nature, archaeological material, and the knowledge it contains cannot be replaced.

This document sets out how North Devon District Museums will work with archaeological contractors and planning archaeologists to ensure that archaeology generated as part of the planning and development process.

North Devon District Museums will only accept finds of an exceptional nature and ones that significantly add to its holdings of a community's heritage. The Museum of Barnstaple and North Devon will act as the consulting museum to work with archaeological contractors and planning archaeologists to create an archive of the other material which is deemed worthy of preservation but cannot be taken into the Museum's collection. This archive will have been subject to agreed sampling and disposal strategies which will have taken into account the Museum's existing archaeology collection.

The object element of the archive will be stored with the museum attics.

The document element, whether 'born-digital' or retrospectively digitised, will be deposited with Archaeology Data Services (ADS) hosted by the University of York.

The North Devon District Museums Service will charge a box fee for items it accepts. Deposition with the museum stores will be at the archaeology contractor's expense.

North Devon District Museum Service reserves the right to refuse to accept archaeological material that does not meet the conditions outlined in this document. When North Devon District Museum Service receives archaeological material, it accepts responsibility for it in perpetuity. It accepts archaeological material on the basis of making it publicly accessible through exhibition, education and research.

2. MANDATORY CONDITIONS OF DEPOSITION

- 2.1 That the site lies within North Devon District Museum Service collecting boundaries.
- 2.2 That Museum has been contacted prior to commencement of the archaeological project and it has been agreed that the Museum of Barnstaple and North Devon is to be the consulting museum.
- 2.3 That the archive is complete and fieldwork is not on going. Any sampling strategies need to have been carried out in consultation with North Devon District Museum Services prior to deposition.
- 2.4 That any reference numbers or accession numbers issued by the Museum prior to commencement of the excavation has been used to number all items in the finds, documentary and digital archives as specified.
- 2.5 That if any items are accessioned by the Museum, a signed transfer of title form will have been obtained by the excavator for North Devon District Museum Service.
- 2.6 That a copyright licence has been assigned to North Devon District Museum Service.
- 2.7 That where human remains are included in the archive, there is an accompanying copy of the associated paperwork, required according to current law, in the documentary archive.
- 2.8 That any conservation work essential for the long term preservation of finds within the archive has been completed by the excavator and is fully documented.
- 2.9 That the documentary and finds archives have been prepared to the standard specified in this document.
- 2.10 That the contractor has submitted a 'Statement of Potential' about the site archive. This only needs to be a brief synopsis or paragraph outlining the importance, or not, of the site and its finds. This will serve as a good starting point for use of the archive and will be included on a future museum web entry for the site.
- 2.11 That an Online Access to the Index of Archaeological Investigations (OASIS) form has been completed for the site
- 2.12 That charges relating to the deposition of the archive have been paid.

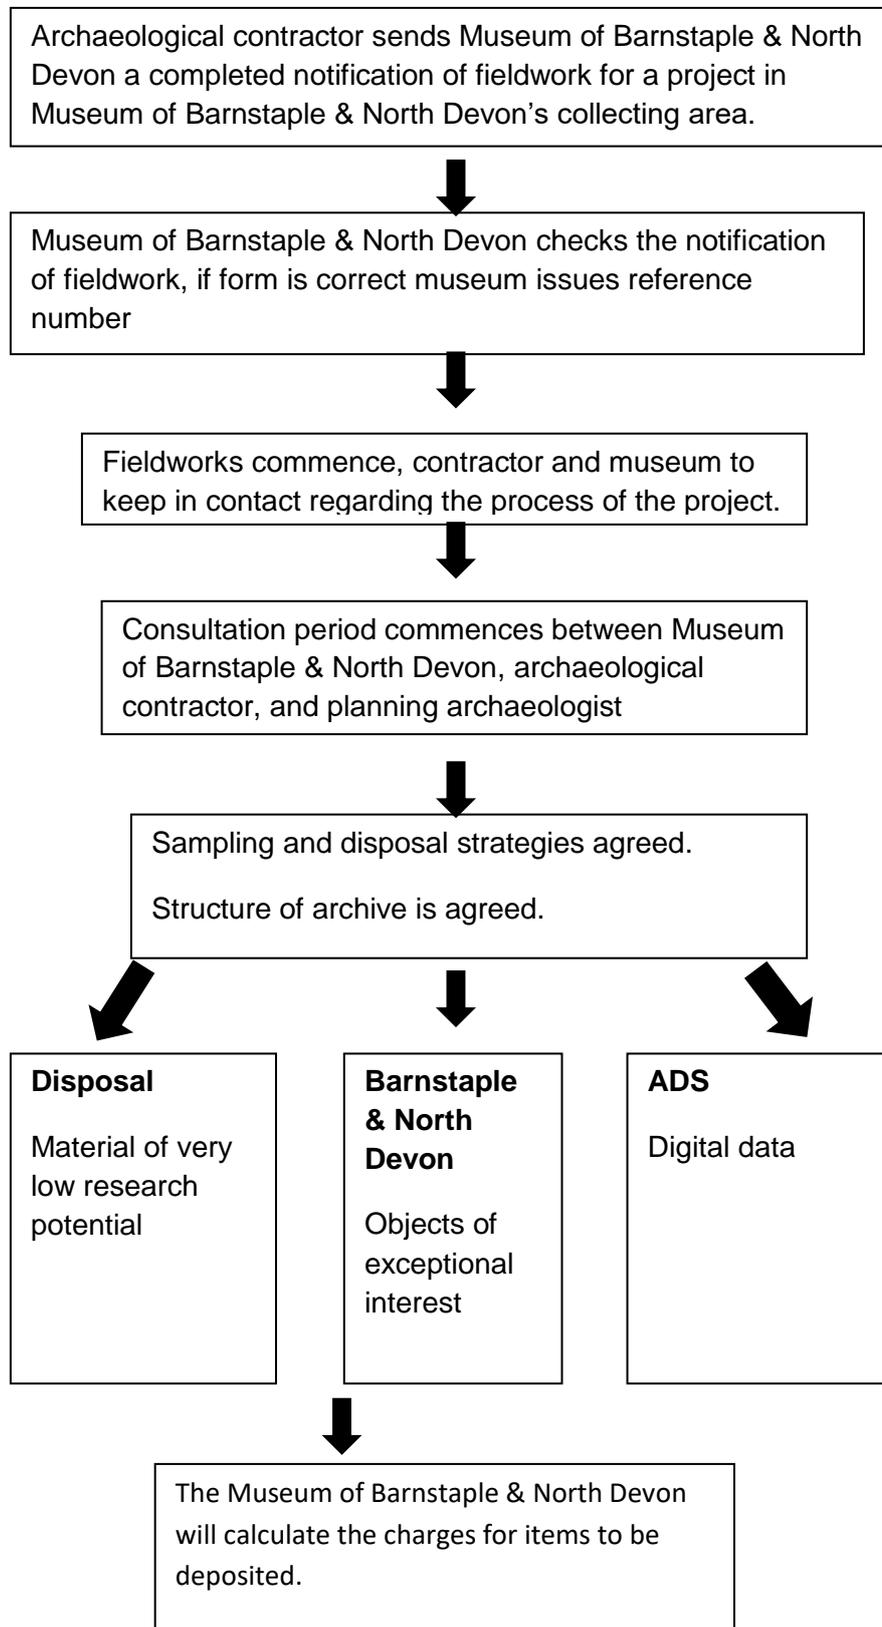

3. NORTH DEVON DISTRICT MUSEUM SERVICE COLLECTING BOUNDARIES

North Devon District Museum Service collects archaeological material from the following district council areas: North Devon, Torrington and Lundy Island. Subject to confirmation, these include the parishes of Beaworthy, Highampton, Ashbury, Northlew, Hatherleigh, Monkokehampton, Meeth, Iddesleigh, Broadwoodkelly, Exbourne, Jacobstowe and Inwardleigh

For a map showing the collecting boundary see Appendix 1. The Museum cooperates with Plymouth City Museum & Art Gallery, Torquay Museum and Royal Albert Memorial Museum (RAMM) to cover archaeological collecting across the county.

4. PROCESS CHART

This chart outlines the process through which North Devon District Museum Service interact with archaeology and the planning process

5. CONTACTING MUSEUM OF BARNSTAPLE & NORTH DEVON PRIOR TO FIELDWORK

As soon as the archaeological contractor has been commissioned to undertake an archaeological project within the North Devon District Museum Service collecting area they should complete a Notification of Fieldwork form (see Appendix 2) and email or send it to the address below. The Museum of Barnstaple & North Devon will agree, in principle, to be the consulting museum, providing the excavator fulfils the standard as set out in this document. At this point The Museum of Barnstaple & North Devon will issue a reference number which can be quoted in all future correspondence regarding the excavation. WSI, correspondence with North Devon District Museum Service and quoted in data submitted to OASIS and ADS. This number is used to track archaeological activity and does not commit North Devon District Museum Service to accepting material from the site into its collection. It acts as the start of a period of consultation between the archaeological contractor, the planning archaeologist and North Devon District Museum Service.

Contact details are:

Samantha Bevan

Telephone; 01271 346747

Museum Assistant

Email;samantha.bevan@northdevon.gov.uk

Museum of Barnstaple & North Devon

The Square

Barnstaple EX32 8LN

6. CONSULTATION PROCESS

The consultation process will lead to an archive being formed that can be deposited with the Museum. During consultation sampling and disposal strategies can be formulated, these will take account of the sizeable collection already held by Museum of Barnstaple and North Devon. Any objects to be accessioned by North Devon District Museum Service will be selected. It is likely that the consultation will take place at the archaeological contractor's premises. A charge of £41.00 per hour will be made to cover curatorial time taken during consultation.

7. ALLOCATION OF NORTH DEVON DISTRICT MUSEUM SERVICE ACCESSION NUMBER

Should the project find objects of an exceptional nature or of high significance to a community's heritage then the museum may decide to acquire them for its collection. In this case the Museum will assign a unique accession number to the site. Items given accession numbers should also be quoted in data submitted to OASIS and ADS and in final published reports as an aid to researchers and museum staff.

Appendix 6 lays out how the accession number is used in relation to different classes of finds (sub-numbered by material, period etc.)

Important

Where individual artefacts have been identified within specialist reports it is essential that they are individually identifiable within the archive. Similarly, where specialists have sorted artefacts into different types within a context, these groups should be bagged accordingly and labelled with their identification. This aids future research and use of the collections.

8. DIGITAL DATA

The Museum expects that the documentary element of an archive is deposited as digital data with the Archaeology Data Service in York.

Tenders submitted for sites must cover the cost of depositing any digital data with ADS as well as the excavator's time needed to prepare digital material for ADS deposition.

The process is as follows:

8.1.1 Excavator prepares site for deposition with digital material being deposited with ADS.

The digital archive material must:

8.1.2 Be prepared to ADS specifications for file format and documentation.

8.1.3 Name all files in accordance with ADS requirements. As far as possible the file names should mirror the reference number (point numbers need to be substituted with underscores e.g. 2014.1.1.4 becomes 2014_1_1_4).

8.1.4 Include the associated OASIS id; the OASIS record must list any museum reference or accession numbers for the site.

8.1.5 Excavator includes details in the OASIS 'Archive' section outlining their intended deposit to both the Museum of Barnstaple and North Devon (for finds and documents and the ADS for digital material).

8.1.6 Excavator submits digital archive to the ADS and signs an ADS licence.

8.1.7 ADS submits invoice to excavator.

8.1.8 Excavator settles invoice.

9. TRANSFERRING TITLE

Any parts of the archive being accessioned by The Museum should have signed title transferred to North Devon District Museum Service prior to deposition of the archive (see Appendix 3). The excavator is the signatory for the documentary archive and the freehold landowner is the signatory for the finds archive.

10. ASSIGNMENT OF COPYRIGHT

Copyright to the archive must be made available to North Devon District Museum Service via the Copyright Licence form for unrestricted internal use of the archive. (see Appendix 5). The archaeological contractor will need to be the signatory for the Archaeology Data Service Licence.

11. ESSENTIAL CONSERVATION WORK

All essential conservation of archaeological objects must be completed prior to deposition. Where appropriate, conservation issues should be discussed with North Devon District Museum Service in advance of work being carried out. Full records of any conservation work and treatment carried out need to be included in the archive. All conservation work must be carried out by a professional conservator. If in doubt, contact the museum for advice.

12. STANDARDS FOR PRESENTATION OF FINDS AND DOCUMENTARY ARCHIVES

Both the finds and documentary archives must be prepared to the required standard of North Devon District Museum Service. This is set out below. Archives must be presented in clean packaging.

12.1 FINDS ARCHIVES

12.1.1 Sampling and Disposal

Sampling is increasingly used to discard bulk material where it is thought to be surplus to future research needs. This should be discussed with the museum in advance of any sampling process being carried out. All sampling strategies need to be fully documented in the final archive. The existing holdings of North Devon District Museum Service archaeology collection will be an important factor that informs the sampling and disposal strategy.

12.1.2 Bulk finds

12.1.2.1 Cleaning

All bulk finds must be cleaned. The only exceptions are where it is thought cleaning will destroy important evidence regarding the function of an object. Finds such as washed pottery and bone must be allowed to fully dry before being bagged up. If finds are packaged damp, mould growth will occur.

12.1.2.2 Marking

Where possible all bulk finds must be marked with the reference number or accession number followed by the context number in brackets (see 7 and appendix 6). On finds where the application of paraloid B72 diluted with acetone will not damage the object, a layer of paraloid should be applied and the number written onto the paraloid when it has dried. This should be done using a mapping pen and black

'Indian' ink. White ink should only be used on very dark finds as it gives a more untidy result and tends to be less permanent. 'Windsor & Newton' or equivalent quality inks must be used; that is water resistant drawing ink made from a lightfast pigment in a shellac solution (can be thinned with distilled water if required). A top coat of paraloid should be added to ensure the longevity of the number.

The writing should be small, neat and legible. Pottery sherds should be marked on the inside towards the middle. This is preferable in case the pot is ever reconstructed and the edges consequently obscured. It also means that the number is more likely to survive if the sherd is chipped or further sampled.

It is not possible to mark some bulk finds such as: nails; slag; samples; artefacts with very rough surfaces, or those which are very small.

For a full guide to marking see

<http://www.collectionslink.org.uk/programmes/museum-accreditation/926-labelling-and-marking-museum-objects>

12.1.2.3 Bagging up

All bulk pottery, bone, nails, slag and glass must be bagged up, according to material and context number, using at least 200 gauge self-seal polythene bags with three white write on panels. Bags should not mix materials or contexts. Bags should hold an appropriate amount of material for their size. Metal finds should always arrive in sealed 'Stewart'-style boxes with a desiccating agent (e.g. silica gel). Polythene bags containing metalwork should be perforated.. A quick method of doing this is to use a pricking wheel of the type available from needlework shops.

The site Reference number should be clearly marked using permanent markers on all finds bags, being mindful of leaving space for the addition of any point numbers by museum staff. The listed contents should be clearly visible from the outside of the bag. Information should be written onto the bag using a Kaiser-Schreiber film marking pen or a permanent black marker pen.

12.1.2.4 Boxing up

Only boxes of the correct dimensions and acid-free properties should be used (see 13.2.1). Bagged up bulk finds should be placed in AAZ1046 sized low acid boxes or where there are a small number of finds AAZ1045 boxes. If the size of individual objects cannot be accommodated in these sizes of box then box AAZ1047 can be used but this should be the exception. Occasionally, boxes might be needed to house finds which have larger dimensions (see 13.1).

Out of necessity, boxes of finds are often stored on high level shelves and, as such, become dangerous to lift if they are too bulky or heavy. Apart from small sites, where all the finds will fit into one box, materials should not be mixed. For such smaller sites, ideally boxes should be partitioned using acid-free boxboard. Boxes should not mix finds of significantly different robustness.

12.1.2.5 Labelling boxes

Boxes must be labelled using foil backed box labels. The labels should preferably be printed but, if handwritten, need to be legibly filled out using an archival permanent black marker pen. Labels must be stuck to the left side of both a short and long side of the box.

12.1.3 Small finds

12.1.3.1 Cleaning and conservation

All small finds must be cleaned and, where necessary, treated by a professional conservator to ensure their long-term preservation.

12.1.3.2 Marking

Where possible, all small finds should be marked using their unique identifying number (see 7 and appendix 6).

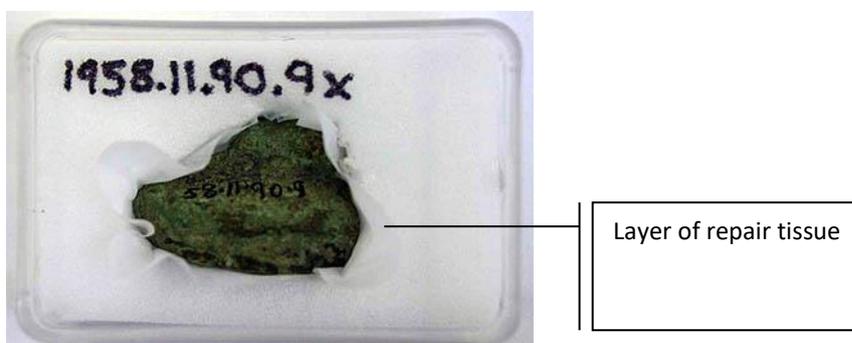

Objects should be marked discreetly but not obscurely. The marking should not detract from the potential display of the object.

12.1.3.3 Packaging (also fragile bulk finds)

In general, small finds need to be housed in more protective storage than bulk finds, as they are usually more delicate in nature.

Very robust small finds may be bagged in the same manner as bulk finds.

Moderately robust small finds can be cushioned on a layer of polyethelene 'jiffy' foam in a polythene bag. They should not be wrapped but should be visible through the clear side of the bag. Bags should be perforated. More delicate small finds should be housed in clear, non-hinged, polystyrene 'crystal' boxes in plastazote inserts. These should consist of a layer of plastazote, which fits into the bottom of the box, and a top layer, which has a cut-out in the shape of the object, into which the object is placed. Ideally, a layer of PEL wet strength repair tissue should be placed between the object and the cut-out to facilitate easy removal. The small find should be visible through the lid of the box. Where necessary plastazote 'braces' should be put over the object to prevent it moving and banging against the lid.

Packaged metal small finds and other small finds, which need to be kept in regulated micro-environments, should subsequently be packed with humidity absorbing crystals into a polythene 'Stewart' box (see 13.2).

Silica gel stored with ferrous objects should be pre-conditioned at below 15% relative humidity. With non-ferrous metals the silica gel should be pre-conditioned to below 35% relative humidity.

Polythene 'Stewart' boxes must also have a humidity indicator strip placed inside. Please position this so that it is visible from the outside.

Larger metal or composite objects may need to be housed in their own Stewart boxes. Again, these finds should be supported by plastazote, have a regulated micro-environment and a humidity indicator strip.

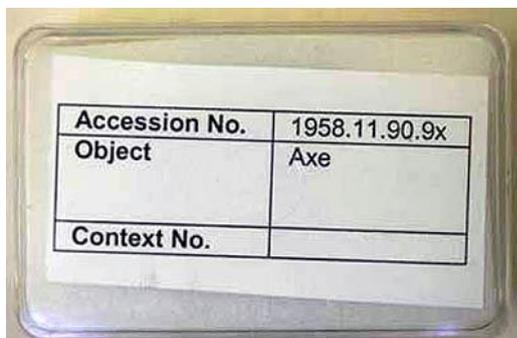

12.1.3.4 Boxing up

Packaged non-metal small finds should be boxed up in low acid boxes (AAZ1045 or AAZ1046). Care must be taken to ensure that the objects do not crush each other and that there is minimal movement in the box. Acid free tissue paper and polyethelene 'jiffy' foam should be used as a buffer within the box or where possible, internal partitions created using acid-free box-board.

Packaged metal objects should be boxed in polythene Stewart boxes. Again, acid-free paper or polyethelene 'jiffy' foam should be used as a buffer to ensure minimal movement within the box.

12.1.3.5 Labelling boxes

All 'Stewart' boxes must be labelled using foil backed box labels. Stewart box labels should be stuck to the left side of a short and long side of the box. Crystal box labels should have a paper label cut to size and placed in the bottom of the box beneath the plastazote layer. The unique accession number should be written with a Kaiser-Schreiber film marking pen or a permanent marker pen onto the plastazote beside the object, and also onto the lid of the box at the top right hand corner and where possible should not obscure the view of the contents.

Accession or reference number written on plastazote with Kaiser-Schreiber film

Accession or reference number written on lid of crystal box with Kaiser-Schreiber film

Where crystal boxes are too small to be labelled using a pre-printed label, they should be put inside a perforated labelled polythene bag with the find showing through the clear side of the bag.

12.1.4 Outsize objects

Some objects, whether bulk finds or small finds, are too large for standard packaging. Items such as large timbers or stone carvings may not require packaging for storage but may sit directly on a shelf. Other items may require bespoke packaging. All materials must be of a conservation standard. All items should have a tyvek label marked with the object number in archival 'pigma' pen and be attached using soft unbleached cotton tape.

12.2 DOCUMENTARY ARCHIVES

Documentary archives should be presented as digital files to ADS. The following guidelines should only be used in exceptional circumstances.

12.2.1 Paper archive

Documentary archives should be organised to a recognised standard, in accordance with the requirements of the Institute for Archaeologists Standard and Guidance for the creation, compilation, transfer and deposition of archaeological archives and the Standard and Guidance for the collection, documentation, conservation and research of archaeological materials (2008).

http://www.archaeologists.net/sites/default/files/node-files/ifa_standards_materials.pdf

<http://www.archaeologists.net/sites/default/files/node-files/Archives2009.pdf>

It is essential that the documentary archive makes explicit the system by which it is organised so that the different elements can be quickly and easily accessed by researchers and museum staff.

It must have:

- A contents list which inventories how many boxes the documentary archive consists of and references where information can be found within it.
- An inventory of the numbers of boxes of bulk finds, including the type of material they contain.
- An inventory of the numbers of boxes of small finds.
- An inventory of the numbers of loose bulk finds and small finds.
- Detailed indexes of the small finds, clearly listing their unique accession numbers as well as their context numbers.
- Detailed indexes of plans clearly listing their unique accession numbers.
- Detailed indexes of photographic images and their media clearly listing their unique accession numbers.

Elements of the paper archive must not include staples, metal paper clips, rubber bands, tape, items held together using glues or other adhesive fixatives. These are destructive over time and most adhesives fail leading to the disassociation and/or loss of information.

12.2.1.1 Papers

- Each section must have its own acid-free archival manuscript folder/s. The folders should be marked on the outside in archival pencil in the top right hand corner with the site accession number and the archive section number/description. Each folder should be numbered referencing its documentary archive box number and its location within the box e.g. Box 1, Folder 1. These numbers should also be marked on the folder as previously described.

- Every separate paper must be marked with the site accession number and the archive section number in archival pencil in the top right hand corner. If the papers are computer generated these numbers should be printed.
- The folders must be placed in acid free archival flat document cases of the correct dimensions.
- Document cases must be labelled with foil backed box labels.
- If and when the excavation is published the museum must be sent two copies of the publication.

12.2.1.2 Plans

All plans must be marked with their reference number. Ideally, this should be done at the top right hand corner of the plan using archival pencil. (2b pencil)

12.2.1.3 Photographic archive

12.2.1.3.1 Marking

All digital images, photographs, negatives, slides and x-rays need to be given a unique identifying number.

Photographs should be marked on the back using an archival pencil (2b). If the surface will not take pencil then a permanent black marker pen should be used. Try to avoid light areas of the image as the number can show through.

Where possible, negatives and x-rays should be marked using an extra fine white marker pen.

Slides should be marked using a permanent black marker pen or Kaiser-Schreiber film marking pen on the casing.

12.2.1.3.2 Packaging

Photographs, negatives, slides and x-rays are stored by hanging vertically in metal filing cabinets. Photographs, negatives and slides must be housed in polypropylene wallets of the appropriate configuration according to their size. Wallets must not mix photographs, negatives, slides and x-rays. Each image must have its own pocket. Do not double up photographs etc. The wallets must also be labelled at the top with the range of accession numbers of the items housed in the wallet. This needs to be done using foil backed labels (see 10.3) and permanent archival 'pigma' marker pen. The wallet also needs to be provided with a file hanger.

13. MATERIALS AND SUPPLIERS

If an excavator already uses materials which they feel correspond to those listed and would like to use these instead, please get in touch to discuss this **before** going ahead and using alternatives to those items listed.

For full details of suppliers see 13.4

13.1 Low acid boxes for finds

Use: To store bulk finds and small finds where appropriate.

Supplier: G. Ryder & Co. Ltd

Details:

External dimensions in mm's

G. Ryder box code	Length	Width	Depth	Lid depth
Finds box AAZ1045	394	241	76	70
Finds box AAZ1046	394	241	152	70
Finds box AAZ1047	394	241	304	70

13.2 Polythene 'Stewart' boxes

Box name	Azpack Product Code	Dimensions in mm
Giant storer	1781 008	150 x 305 x 305
Pizza storer	1225 008	60 x 240 x 240

13.3 Foil backed box labels

Preservation Equipment Ltd	Supplier code	Dimensions in mm	Use to label
Single sheet	387-3025	280mm x 216mm	Documentary archive boxes
10 label sheet	387-5352	102mm x 51mm each label	Stewart boxes which are too small to accommodate the 6 label sheet size label
84 label sheet	387-2520	47mm x 11mm	Photographic wallets, slides

13.4 Table of Suppliers

APPENDICES

1. Appendix 1: DETAILS OF COLLECTING BOUNDARIES

2. Appendix 2: NOTIFICATION OF FIELDWORK FORM

ARCHAEOLOGICAL CONTRACTOR:

Commencement date:

Type of fieldwork: (please circle) evaluation/watching brief/field walking/excavation/survey/building recording

Name and address of landowner (or whoever is able to transfer title of objects to Museum of Barnstaple & North Devon);

Site manager:

Site name: Parish:
Site code: NGR:

EH code (if applicable):

Planning Authority:
Application/Permission/Consent number:

Quantity of material expected (boxes): <10 / <20 / <30 / <40 / <50 / >50

Conservation problems anticipated (eg. waterlogged material, organics):

TO BE COMPLETED BY MUSEUM ON NOTIFICATION

Reference number: Signed:
Date issued:

TO BE COMPLETED BY MUSEUM AFTER CONSULTATION PROCESS

Accession number: Signed
Date issued:

3. Appendix 3: TRANSFER OF TITLE FORM

This form should be printed and will be used in conjunction with North Devon District Museum Service’s standard entry form. The entry form is a paper form that will be signed by owner of the objects or the depositing archaeological contractor at the time of deposition.

<p>Museum accession number:</p> <p>Site name and site code:</p> <p>Name of Archaeological Contractor :</p>

<p>Name and address of owner:</p> <p>Telephone Number:</p>

I hereby confirm my donation of the archaeological discoveries (any objects, materials or remains of archaeological interest, other than those articles declared by Coroner’s Inquest to be Treasure) recovered from the site named as an absolute and perpetual gift. I wish all material to be unconditionally transferred to the North Devon District Museum Service, a service of North Devon District Council.

Signed ----- **Date** -----

Print name -----

Data Protection

The Museum retains the names and addresses of persons donating, bequeathing, selling or loaning objects because this information forms part of the object’s history. This information is for the Museum’s records and is not made available to any other organisation.

3. Appendix 5: COPYRIGHT LICENCE FORM

Museum accession number:

Site name and site code:

Name of Archaeological Contractor :

Name and address of copyright holder:

Telephone Number:

The above hereby grants to the Museum of Barnstaple & North Devon a perpetual royalty-free licence to:

1. reproduce all or part of the Archive for the purposes of research, study and conservation
2. display copies of all or part of the Archive in any medium
3. publish all or part of the Archive in any form or medium and in any publication
4. permit third parties to do any of the above.

I undertake and warrant that:

1. I represent the sole, unencumbered owner of the copyright in the Archive and are free to grant the licence set out above
2. no use by the Museum of Barnstaple and North Devon in accordance with the above licence will infringe any rights of a third party
3. this licence is binding on the heirs, assigns and successors of the above organisation.

When all or any part of this Archive is used as part of this licence the following should be credited:

Data Protection

The Museum retains the names and addresses of persons donating, bequeathing, selling or loaning objects because this information forms part of the object's history. This information is for the Museum's records and is not made available to any other organisation.

Appendix 6: ACCESSION NUMBERS - SUB-NUMBERING SYSTEM

A flexible system: additional sub-numbers can be created according to the finds per site – periods, materials, typologies can be added as sub-number groups. Individual numbers can be allocated to individual objects.

.1	Paper archive		
		1.1	Primary archive paper records (context sheets etc)
